8 TIPS TO IMPROVE YOUR PARKING STRATEGY

Parking can be a challenge to find, and if a driver is not careful, it can create safety and security risks. Truck drivers need to be smart about where they choose to park. Here is a short list of parking tips that can help protect you and your equipment as well as give you peace of mind.

PRE-PLANNING

Reduce stress each day by planning where and when you plan to stop. Try parking in familiar locations whenever possible and avoid areas that pose unnecessary risks. However, be ready with a backup plan so you can park in a safe location without running out of available driving hours. There are mobile apps available that can help with realtime updates on parking availability.

RESERVATIONS

Take advantage of parking locations that accept reservations. If not, remember the early bird gets the worm. Plan to arrive early before truck stops and rest areas start filling up in the early evening.

LOCATION, LOCATION, LOCATION

Avoid parking on the end of a row or near the entrance or around the busy fuel pumps, if possible. Either can increase your risk of being hit by another vehicle. Also, be mindful of trucks parked over the line or at an angle. Try another spot, but if none is available, consider taking pictures of the other vehicle's license plate and DOT number just in case.

CONSPICUITY

Choose a parking spot with plenty of illumination. Using a well-lit parking lot can help deter would-be thieves. In addition, for your own personal safety, well-lit areas allow you to keep an eye out for anyone loitering near your truck.

TRAILER SEALS AND LOCKS

Ensure your trailer is sealed and padlocked. At each stop, verify these have not been tampered with. Similarly, use a kingpin lock and double check that the trailer is correctly hooked before driving away.

STEALTH PARKING

Always lock the truck and roll up the windows when you are away, and never talk about your cargo or route with strangers. Keep valuables out of sight. When inside the sleeper, use window screens and lock the doors.

AVOID BACKING OUT OF SPOTS

Try to use parking spots that allow you to pull through to leave. If you have to back out, get out and look before moving the truck. Preferably, use a spotter.

SHIPPER/RECEIVER PARKING

Ask the shipper or receiver if you can park at their facility and sleep on the site. Your dispatcher can help with this and ask permission when the load is booked.

Knowledge Verification

Please answer, and forward a completed copy to your Safety Department/Safety Representative.

1. You should look to plan ahead for your parking requirements. ☐ True ☐ False
2. Avoid parking on the end of a row or near the entrance or around the busy fuel pumps ☐ True ☐ False
3. Using a well-lit parking lot can help deter would-be thieves. ☐ True ☐ False
